Accreditation

- organises accreditation at the national and European levels; insists in public authority nature of accreditation and sets the framework for the recognition of EA so as to ensure the proper functioning of a rigorous peer evaluation.

Market Surveillance

- ensures that national authorities are given equivalent means of intervention and the necessary authority to intervene in the market (e.g. restrict or withdraw non compliant or unsafe products).
It ensures cooperation as between the internal authorities and the customs authorities controlling products entering the market from third countries and sets the framework for the exchange of information between national authorities and cooperation between them.
